EuroVelo

EuroVelo, the European cycle route network, is a project initiated and managed by the European Cyclists' Federation (ECF). The network comprises of 14 long distance cycle routes, which, when complete, will total over 70.000 km.

Definitions

We aim to have the entire EuroVelo network completed by 2020 but not all sections are ready just yet. We have therefore tried to show on the map the conditions that you are likely to experience when out and about. Three different categories have been used:

- **Realised** – Sections over 50 km in length that have (at least) national signposting in place and detailed route descriptions are available online.
- **Non-realised** – Proposed sections that either are not signed yet and/or have no detailed information available at present and/or the route currently contains some very problematic sections (e.g. stretches on public highways with high levels of traffic)
- **Planned** – Purely hypothetical routes between two points.

Of course, our network of National EuroVelo Coordination Centres and Coordinators are working on improvements all the time, so you may now find that signage has been installed along certain sections; information is available online or solutions have been found to the problematic sections. Keep checking **www.EuroVelo.com** for the latest situation along each route.

Sustainable Tourism

Bike and Train

One of the many benefits of cycle tourism is that it typically has very little impact on the environment. What impact it does have can be reduced even further if you travel to and from your cycle trip by public transport.

Taking your bike to your destination by train is the ideal combination for environmentally friendly mobility in both short-and long-distance traffic. Most locations in Europe are accessible by train and by booking in advance you may be able to find some cheaper fares. Many trains are now equipped with special bicycle areas but not all, so it is best to check with the rail operator before your journey. See also if you need to make reservation.

Some of the best websites for planning a train journey with your bike are:
Deutsche Bahn: www.bahn.de
Schweizer Bundesbahn: www.sbb.de
Société nationale des chemins de fer français (SNCF): www.sncf.com

EuroVelo

EuroVelo is a project of the European Cyclists' Federation (ECF) to develop a network of high-quality cycling routes connecting and uniting the whole European continent. The routes can be used by long-distance cycle tourists, as well as by local people making daily journeys. EuroVelo currently comprises of 14 routes and it is envisaged that the network will be substantially complete by 2020.

The EuroVelo Map

This map gives you an overview of the entire European cycle route network. The map shows the countries each route visits, the current status of the route, the main public transport connections, as well as some of the major tourist attractions to look out for along the way. On the back of the map is a short introduction to each of the 14 routes together with sources of further information at a national level.

European Cyclists' Federation (ECF)

The European Cyclists' Federation (ECF) has been the voice of European cyclists for 30 years. Representing organisations in 40 countries with over 500,000 active members, the ECF is pledged to ensure that bicycle use achieves its fullest potential so as to bring about sustainable mobility and public well-being. To achieve these aims, ECF seeks to change attitudes, policies and budget allocations at the European level. ECF stimulates and organises the exchange of information and expertise on bicycle related transport policies and strategies as well as the work of the cyclists' movement.
The ECF owns the trademark for EuroVelo and coordinates its development at the European level.

National EuroVelo Coordination Centres and Coordinators (NECC/Cs)

At a national level, the organisation, development and operation of the routes is undertaken by National EuroVelo Coordination Centres and Coordinators (NECC/Cs). The composition of these organisations varies but often include government bodies, tourism organisations, relevant NGOs, public transport companies and service providers. The ECF is working to ensure that there is a Coordination Centre or Coordinator established in every country in Europe.

Follow the EuroVelo signs

In more and more locations around the European cycle route network, official EuroVelo signage is being installed to make your journey even easier. Just look out for the distinctive EuroVelo signs (see left), which can be incorporated within national signage schemes in several different ways (see examples on the right). You can now follow the EuroVelo signs in parts of Austria, France, Hungary, Slovakia, Switzerland and the UK to name just some of the countries that have introduced them.
